

Pillow Tanks

SEACONTAINER* MULTI-USE COLLAPSIBLE STORAGE SYSTEMS

These 250-gallon pillow tanks have undergone a standard 24-hour inflation test before being folded and packaged for shipping.

Heavy-duty polyurethane coated fabric, 2" seals, and reinforced corners ensure durability and reliability of these 50,000 gallon tanks, even under extreme conditions.

This 300 gallon SeaContainer has built-in foam construction for floatation and extended fill fitting and vapor relief valve for exceptional performance during oil spill recovery operations at sea.

FLUID CAPACITY - SeaContainer* Pillow Tanks are available in a wide variety of sizes and styles to meet liquid storage requirements from 100 to 100,000 gallons. Standard and custom-designed systems are readily available.

SAFETY & RELIABILITY - Pillow Tanks are made of tough poly coated fabrics to provide unsurpassed resistance to the widest variety of organic and inorganic chemicals and to weathering, abrasion, puncture and temperature.

MATERIALS COMPATIBILITY - By utilizing the most rugged and highly resistant construction materials, Pillow Tanks can be made to safely accommodate storage of oil, sludge, gasoline, hydraulic fluid, water, edible liquids and almost any other liquid substance.

FUNCTIONAL FITTINGS - Our flexible tanks' drain/fill fittings are positioned for easy use and uniquely designed for uninterrupted, complete drainage. Floating tanks feature built-in floatation and extended fill fittings and relief valves. Custom hardware is easily incorporated as needed.

ECONOMY - SeaContainer* Pillow Tanks are inexpensive, and superior materials and quality construction mean long life with minimal maintenance. Light weight, compact storage and ease of use keep transportation, storage and manpower costs to a minimum.

- Other sizes available upon request
- Standard Pillow Tank models are constructed of Kepelastex 100% polyurethane coated fabric.
- A wide range of other chemical resistant materials are available and normally in stock to meet your specific requirements.

Product Name: SeaContainer* Pillow Tank

Description: Rugged tanks providing compact, portable storage for oil, edible liquids, water, hydraulic fluid, gas storage and transfer capacity. Standard Pillow Tanks are constructed of very heavy duty polymeric alloy coated fabric. The Tanks are fabricated with 2" dielectrically sealed seams and reinforced areas at the flanges. They come complete with two aluminum female NPT fittings, with caps, ready for use.
